But, if you're not completely convinced then I'm gonna' let you in on a **secret** that might just make you so downright pissed off that you'll feel like punching through the computer screen in front of you.

You see...

You've Been Lied To and Taken For A Ride!

And God knows how long it's been going on.

The truth is, when cable companies raise their rates, they quickly blame the cost of programming, such as sports channels, and the expense of upgrading their systems.

In fact, a **special report** by two of the U.S.A.'s leading consumer groups says that the reasons that cable companies state "**Don't add up.**"

"Cable Companies Are Taking Advantage..."

"Consumer Federation of America and Consumers Union, the publisher of *Consumer Reports* magazine, state that the primary reason that cable rates have skyrocketed in recent years is that cable companies are taking advantage of their monopoly power."

-- ConsumersUnion.org

But don't take my word for it...

Here's that report for you: [**Click Here For Proof That You Could Be Gypped!**](#)

Think about it for a moment...

-- How much does it really cost to send over an electrical signal from one point to the next?

Not a heck of a lot right?

-- How much more do you think these cable companies are paying to deliver high speed internet access and "low-cost" digital telephone service to you on the same damn cable lines?

They flip a switch and they're done, yet you end up paying even more!

-- Sure you need a telephone and internet access but do you really need to pay upwards of \$100 a month for the cable service on top of it?

Heck NO!

To make matters even worse, these guys stick another price tag on your service as soon as you want the latest channels like the new sports channels or HDTV or other international channels.

Three Reasons Why Cable Companies Can Charge So Darn Much --

- Money (a.k.a. Greed)
- Lack of Competition
- A Whole Lot of Conspiracy...

You see, while digging around during the five years it took me to develop this software I uncovered a lot of dirt...much of which I cannot tell you here today but --

It's pretty obvious why they want more money while they're literally swimming in it.

They can also do whatever the heck they want to how much you pay because they don't have any real competition.

"Cable companies would not be able to raise prices nearly as much if they did not have monopoly power," said Mark Cooper, Research Director of Consumer Federation of America and the author of the report.

And that's just the tip of the iceberg...

The thing is, these guys are also limiting "What" you are able to view unless you pay them even more money and that's IF they can even give you the channels you want!

Hmmm...that sounds strange, don't you think? -- That they can't give you all the channels you want even if you were willing to pay for it.

Well, I thought so too and I quickly discovered WHY!

You see I discovered long ago that if you're looking for answers, **you have to ask the right questions.**

And so I asked...

"What is single thing that divides more people in the world than anything else?"

Hint: *It's not religion, race or anything else you may have thought in the past...*

I'll tell you the answer in just a minute but first --

How Does TV on PC Elite Work?

I know that by now you're **foaming at the mouth** wondering how does this thing work?

Well...simply put:

All you need is a regular-old internet connection and TV on PC Elite and that's it!

Download the software, install it on your computer and you're ready to watch TV on your PC!

You **don't need any special hardware** or TV decoders or any of the 'so-called' necessary crap that you might have seen or heard of before.

The **TV on PC Elite** software acts as **your own little cable company** and grabs the TV signals directly from the TV channel's servers.

It Virtually BLASTS The Coolest Channels From All Over The World Right On To Your PC!

It does this by using 'Streaming-Media' technology and by converting the signals broadcasted by the stations themselves.

YES - even an internet connection speed of 56 Kb/s will work! So If you're on dial-up...No Worries!

Once the connection is made, "Voila" you have yourself whatever channel you like...

And not only that but you can also get it in **High Definition TV too!**

In essence you're cutting out the middle-man (Big Cable) and getting your service direct.

Now, just in case you're thinking...

"Hey Mike That's Great For My Computer But -- What About My TV?"

In case you didn't already catch it...

The thing is, most computer video cards already have what's called a TV out port so you can literally **watch all of these amazing channels** from the comfort of your living room or bedroom TV too!

Prior to the release of TV on PC Elite, you had to go out and spend money on TV tuner cards that only offered a few channels and limited access because they didn't communicate directly with the TV channel's servers.

To top it off, you still had to go out and get special software to make it work.

Once you have **TV on PC Elite**, you don't need those things and --

Now don't have to bother wasting your time with **illegal de-scramblers that either don't work or get you in BIG trouble!**

Special Note: As I'm writing this I'm watching the hottest Reggaeton music videos on a French TV station -

"SunVibz TV"...Wait - A Shakira video just came on... ooh that booty!

HOLY Smokes...Rihanna and then Cassie videos just came on back to back too...!"

With **TV on PC Elite** You Can Quickly And Easily Watch Almost Any Channel You Want **24 Hours A Day And 7 Days A Week!**

You have access to:

- **HDTV Channels**
- Movies
- **Sports**
- Music
- **News**
- Weather
- **Kids Channels**
- Educational
- **Shopping**
- Political News

Something This Incredible Really Ought To Be Banned, But...

TV on PC Elite is 100% Legal!

You're simply grabbing signals that were already being broadcasted all over the world by each TV station when you launch the software.

All you're doing is cutting off the middle-man. (Big Cable and Satellite)

Since **TV on PC Elite communicates directly with the TV station's servers**, if they didn't want you to have the signal...believe me you wouldn't get it!

Just sit back and enjoy all great shows, music videos and movies!

Does your ordinary cable or satellite service offer you that ?

I highly *doubt* it.

But better yet...not only do you get all of the things I mentioned before and then-some but you can easily install this software on your laptop computer and **take it ANYWHERE you go!**

You'll never miss your favorite shows or sports games ever again!

Oh and remember my 'conspiracy theory'?

Well what I discovered and **you may already know** this, is that the governments of each county control what you can and cannot see on cable and satellite TV.

So, for something that should be international...

“...You basically have a *snowball's chance in hell* to really experience news and other events from the rest of the world! This is the one of the very things that separates and alienates us from understanding the other people of our planet.”

Now, I don't know about you but I for one DO NOT like to be controlled by **the powers that be** if you know what I mean?

Don't Let The Media Powers Control YOU!

Fact is, control of the media is propaganda specifically **designed to persuade you** on a particular point-of-view.

***** Did you know -- that some of the news channels you watch every day have special "informal" meetings every morning just to discuss a point-of-view on topics they want to focus on so that they can program your mind and personal views on that topic?**

Yes my friend, it is horrible but worse yet it is TRUE!

With **TV on PC Elite** you not only have your own country's news but news from all over the world so you can make and keep your own ideas and **keep ahead of the propaganda and media control!**

If that's not a good reason to **grab this software now**...I don't know what is!

So I decided on a \$59.95 price tag **BUT** after speaking with my colleagues, they reminded me that because I'm using the internet and you can **instantly download this AMAZING software today**, I don't have the costs of packaging or shipping some kind of awkward and expensive equipment so...
